DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 cannot depend from a canceled claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Arnaud (US 5647977).

Arnaud discloses a flow limiting inlet structure comprising a tiered set of one or more baffles coupled to an outlet (see Fig. 11), the discharge rate through the outlet remains substantially independent of the water depth (this is considered to be true when the water depth is at or above the depth where reference character (218) is pointing).

4. Claims 4,5,7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Finley et al. (US 6313545).

Finley et al. discloses a flow limiting inlet structure (see Fig. 14) comprising a discharge riser (this is considered member (20) which discharges fluid) surrounded by a tiered set of nested baffles (40) wherein an inlet area of the set increases as fluid depth increases.

Allowable Subject Matter

5. Claims 1-2 are allowed.

6. Claims 12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 3, 4 have been considered but are moot in view of the new ground(s) of rejection.
